Technical Skills

Programming Languages: Python, Java, SQL, HTML/CSS

AI/ML & Data Science: Machine Learning, NLP, NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, Flask

Databases & Cloud: MongoDB, MySQL

Tools & Platforms: Git/GitHub, Postman

Relevant Coursework: Data Structures & Algorithms (DSA), DBMS, Operating Systems (OS)

Work Experience

Software Development Intern

Oct 2025 – Dec 2025

Madhya Pradesh Poorva Kshetra Vidyut Vitaran Company Limited (MPPKVVCL)

Jabalpur, Madhya Pradesh

- Developed a **Flutter-based mobile app** for Android and iOS, delivering real-time electricity consumption insights to **10 Lakh+** consumers across the distribution network.
- Secured backend integration via **RESTful APIs** with token-based authentication and **IVRS-based consumer identification** to reliably fetch and process live metering data.
- Implemented **TOD (Time-of-Day)** differential logic to disaggregate raw energy register readings into structured **T1-T4 tariff-wise breakdowns** for actionable billing insights.

Projects

Real-Time Fraud Detection with Streaming ML | *Python, Kafka, PySpark, XGBoost, MLflow* 📄 [Repo](#) Apr 2025 – Aug 2025

- Built an **end-to-end streaming ML pipeline** ingesting 284K+ financial transactions via **Apache Kafka**, running real-time **XGBoost** fraud inference inside **PySpark Structured Streaming** with **86.73% recall** and **0.976 ROC-AUC**.
- Engineered **SMOTE-based class balancing** on a 0.17% fraud-rate dataset and tracked all experiments via **MLflow Model Registry**, enabling reproducible model versioning and promotion across staging and production.
- Persisted real-time predictions to **Delta Lake** with ACID guarantees and deployed a **FastAPI** inference endpoint with risk-level scoring, containerized via **Docker** with **Kafka + Zookeeper** orchestration.

MLOps Churn Prediction Pipeline | *Python, MLflow, Evidently AI, FastAPI, Docker, Airflow* 📄 [Repo](#) Jan 2026 – Mar 2026

- Built an **end-to-end MLOps pipeline** for customer churn prediction using **Random Forest**, achieving **80.27% accuracy** and **0.86 ROC-AUC** on the IBM Telco dataset (7K+ records).
- Integrated **MLflow** for full experiment tracking — logging hyperparameters, metrics, and model artifacts across runs — and **Evidently AI** for automated **data drift detection** across 19 features with HTML reports.
- Deployed a **FastAPI** REST inference endpoint with Swagger UI and authored an **Apache Airflow DAG** for scheduled retraining triggered on drift detection, containerized via **Docker**.

Education

Vellore Institute of Technology

Aug 2022 – Apr 2027

Integrated M.Tech in Computer Science and Engineering – CGPA: 8.61

Bhopal, Madhya Pradesh

Extracurriculars

Marathon Runner – Endurance Athletics

2024 – Present

- Completed **2 long-distance 10K runs**, demonstrating physical discipline and mental resilience alongside a demanding academic schedule.
- Sustains a training regimen of **5+ km per week**, reflecting strong time management, self-motivation, and commitment to personal fitness.

Certifications

- Microsoft Azure Fundamentals (AZ-900):** Microsoft
- IBM AI Engineering:** Coursera
- Python Data Structures:** Coursera

Achievements

- Genesis X Hackathon (First Place):** Secured first place by executing comprehensive data analysis and delivering an end-to-end technical solution under competition constraints.
- StockQuest (Winner):** Topped a real-time stock market simulation event, demonstrating strong analytical thinking and financial decision-making under dynamic market conditions.
